

## Joint Webinar: CBRN and VR training

**Date:** 1st of June 2021

**Time:** 13:00 – 16:00

This webinar is a joint event from the Horizon 2020 projects eNOTICE (<https://www.h2020-enotice.eu/>) and SHOTPROS ([www.shotpros.eu](http://www.shotpros.eu)).

Experts from both projects will shed light into the topic CBRN and Virtual Reality training. The goal of this webinar is to examine how VR can be used to train for CBRN incidents. The speakers will look at the requirements for VR training, possible gaps that can exist in real life CBRN exercises, how VR could fill those gaps and how VR is currently being used for CBRN training.

**Participation:** The webinar is open to the public and everyone is encouraged to participate and forward the invitation to their network.

**Technical aspects:** The webinar will take place on Microsoft Teams and the link will be provided to all participants in advance.

**Registration link:** <https://forms.office.com/r/9wZzaTF0cS>

## Agenda

Time	Content	Organisation presenting
12.00-13.00 (1 hour)	All speakers and VESTA available, test technology, give everyone presentation rights etc.	All
13.00-13.05 (5 min)	Welcome, rules of the meeting	VESTA
